

# SECONDARY EDUCATION & SUMMER SCHOOL PAVILION AT IEFT FAIRS

# SECONDARY EDUCATION & SUMMER SCHOOL PAVILION AT IEFT FAIRS

We successfully completed our 47th IEFT Spring Fairs & Seminars with a great participation from the institutions and thousands visitor students & parents. It was a pleasure to welcome around 200 institutions from 30 different countries.

There is a highly growing demand for **high schools, boarding schools, day schools and summer schools** from Turkish families, especially for academic, art, intern and sport schools. Turkish students are more focused on academic studies for graduate and undergraduate programs and high schools. We also observe a huge demand for parent and child summer programs.

Last couple of years, we noticed there is a good demand for top universities' academic **summer session** programs as well. We welcomed leading universities' summer program institutions such as **University of Cambridge - Downing College, University of Oxford - Said Business School Summer Programs, King's College London, University College London, Imperial College London, etc.** We are expecting more American and Canadian universities in our event.

The fall term is a crucial time for Turkish students and their parents to decide whether to study abroad. So, it will be a very beneficial event for you to get and recruit international students at the Turkish market in the fall term.

As IEFT, we are offering a **very special 15% discount** for your participation. There will be a special section and special promotion for high schools at the fair. We will be really happy to welcome you to our Fall Fairs 2026.

You can easily reserve your space through [apply.ieft.net!](https://apply.ieft.net)

MANY MORE...

## **Why Turkiye?**

*Turkiye's 4+4+4 education system creates strong demand for international study options immediately after middle school. With fierce competition and local private school fees ranging from \$20,000 to \$40,000 annually, many families are exploring high-quality international alternatives.*

## **What Do We Offer?**

*As IEFT, we bring prospective students and their families in Turkiye together with top international high schools. We host exclusive events and information sessions where parents and students can meet directly with school representatives, ask questions, and explore enrollment opportunities.*

## **Who Are We Targeting?**

*We are targeting upper-middle class families who are highly motivated to secure the best possible high school education for their children and are open to international opportunities.*

## **When Is the Right Time?**

*The best time to begin the application process is at the end of Year 8. However, we also support transfers for students entering Year 9, 10, or 11.*

## **How Are We Reaching Families?**

*We combine strategic social media campaigns, targeted emailing, and a trusted network of middle schools that encourage parent and student participation. As parents are the key decision makers, our communication is designed to engage them directly.*
